

## PyMOL Plug-in Installation Guide

PyMOL is required if you wish to use parKVFinder with graphical user interface (*parKVFinder PyMOL Tools*). If necessary, refer to this guide for installing PyMOL on Linux and macOS.

*parKVFinder PyMOL Tools* is available to use parKVFinder with PyMOL v1.8 and v2.2 or later. To install the plug-in, follow these steps:

1. Open PyMOL.
- 2) Go to **Plugin** menu → **Plugin Manager**.
- 3) **Plugin Manager** window will open, go to **Install New Plugin** tab.
- 4) Under **Install from local file** Group, click in **Choose file...**
5. **Install Plugin** window will open, go to **KVFinder\_linux** directory and select **parKVFinder\_PyMOL\_tools.py**.
6. **Select plugin directory** window will open, select **/home/<user>/.pymol/startup** and click **OK**.
- 7) **Confirm** window will open, click **OK**.
- 8) **Success** window will appear confirming that the plugin has been installed.
- 9) Restart PyMOL.
- 10) KVFinder plugin is ready to use.
